# Gull-Wing StableSizer

*Platinum Edition*

Fab-Con's New Platinum Edition "Gull-Wing" StableSizer incorporates latest in electronic technology to simplify operation, increase reliability enhance performance, and produce more consistent quality fabrics.

The touch screen graphic interface sets and displays process parameters, and is programmable for fabric styles. Manual controls are also conveniently located at various points on the machine to allow quick and easy process adjustments. A number of operating enhancements such as programmable speeds, oil heated rolls, internal steam plumbing, new compacting zone design and redesigned conveyor and folder result in excellent performance and quality.

Fab-Con's innovative technology utilizing a feed and retarding roll in combination with confining members results in length-wise compression of up to 25%. The Digital A.C. variable speed drives provide vibration free operation at speeds up to 75 ypm (0-68 m/m).

Fab-Con's New Platinum Edition Gull-Wing StableSizer with its newly redesigned compacting section offers unmatched performance and no compromising on fabric quality
