

PRECISION UNIFORM COVERAGE

Setting the standard in rotary spray systems

Zero Waste

CHEMISTRY

- Antimicrobials
- Hydrophobic
- Hydrophilic
- FR's
- PCM's
- Digital print primer
- UV protectors
- Anti-static
- Softeners

APPLICATIONS

- Medical
- Hygiene
- Performance fabrics
- Industrial
- Protective
- Digital printing
- Outdoor fabrics
- Bedding
- Packaging

For over 50 years, US based Consultex has achieved success supplying the textiles and nonwovens industry with our innovative rotary spray technology, providing a no-contact chemical application system with precision control, uniform coating and superior coverage.

FUNCTION

- Chemical add-on selected using intuitive multi-lingual touchscreen HMI
- Closed-loop system with constant flow monitoring
- Add-on rate automatically adjusts with speed changes
- Redundant filtration system
- Automatic tank fill and rinse modes
- Single or dual side configurations available

TECHNOLOGY

- Precisions chemistry add-on regardless of substrate fiber or weight
- Non-contact application
- Less chemistry usage than other coating technologies
- Superior uniformity across web
- Lower drying energy required
- Retrofit & standalone options
